

**Are you a single man with a stammer?**

**Has your stammer impacted on how you approach new relationships?**

I am carrying out research into how men who stammer experience the early stages of relationships, from chatting up someone through to the initial dating situations. If you are an 18 to 30 year old man with a stammer I would be very interested to talk to you about taking part in an informal interview about your experiences, at a time and place of your convenience.

If you are interested to know more about the research, or would like to know how to take part, please feel free to contact me, Paul O'Sullivan, on either 07903 781250 or you can email me on [paul.osullivan.1@city.ac.uk](mailto:paul.osullivan.1@city.ac.uk). I would be happy to discuss the research further with you and give you more information as to how you can be involved.

This research is being carried out as part of a doctorate in Counselling Psychology at City University, London, under the supervision of Dr. Deborah Rafalin, Chartered Counselling Psychologist (telephone: 020 7040 4592, email: [d.rafalin@city.ac.uk](mailto:d.rafalin@city.ac.uk)).

**All information will be treated confidentially**
